

Proposed Statewide Deer, Elk, and Moose Carcass and Carcass Parts Disposal Requirement

Transportation of deer, elk and moose carcasses is prohibited within Montana except when the head and all portions of the spinal column are removed and left at the site of the kill or when such parts will be disposed of in a class II landfill in Montana.

As provided above, only the parts suitable for food with no part of the spinal column or head attached, cleaned hide without the head, skull, skull plate or antlers that have been cleaned of all meat and brain tissue, teeth, or finished taxidermy mounts may be transported within Montana

Nothing in this section shall apply to the transportation or disposal of deer, elk and moose taken by any governmental agency or educational institution.
